

SDU eScience center

Dear researcher at SDU

Below you will find the September edition of the eScience Center's newsletter, where we give you an update on the recent events at the Center and our services, which aim to support your innovative modern research through HPC (High Performance Computing) and cloud infrastructure.

We did not rest on our laurels during the summer.

The first eScience User Forum took place in June, where our users gave us valuable feedback on our services as well as good suggestions for new services and support/training material. We are planning on organizing another User Forum in approximately 2 months from now, where the discussion topics will be more specific. In July, a highly requested new feature was added to [UCloud](#): Public IP addresses. In August, the eScience Center joined [LinkedIn](#) and returned to [Twitter](#).

The calendar for the fall is also full of exciting events:

On the 1st of September we welcomed a new employee to our [research support team/SDU Front Office](#), Dr. Erik Kjellgren, and on the 2nd of September the second webinar in our series of webinars took place. The topic this time was "Teaching Through UCloud" (recordings are available on [our Youtube channel now](#)). For October, you don't want to miss the online AI For Science GPU Bootcamp that [DeiC Interactive HPC](#) (previously known as HPC Type1) and Nvidia have joined forces to organize on the **13th and 14th of October**.

The next eScience Center newsletter will be out in November.

[Did you miss our webinar?](#)

In case you missed the second webinar, *Teaching through UCloud*, in our series or would like to rewatch it, we have made the recording available on our [YouTube channel](#). Here, you can also find the recording of [Read more ...](#)

[Welcome to our new employee](#)

The SDU eScience Center is expanding its research support team/SDU Front Office this month. Dr. Erik Kjellgren has joined us from the 1st of September. Erik already knows the SDU research environment well, as he has a background [Read more ...](#)

[The eScience Center is now on LinkedIn](#)

We have launched a new LinkedIn profile for the eScience Center, where we will be sharing all the news posted on our webpage. If you want to keep track of what is going on at the Center [Read more ...](#)

[New UCloud feature: Public IPs](#)

We are always looking for ways to improve and develop our services. As a new feature on UCloud, public IP addresses are now available on demand via project applications. This new feature makes it possible to access [Read more ...](#)

[AI For Science GPU Bootcamp](#)

The National Facility for Interactive HPC and Nvidia are organizing an online AI bootcamp on the 13th and 14th of October 2021. Researchers can learn how to apply AI tools, techniques and algorithms to real-life problems [Read more ...](#)

[Recap of the first eScience User Forum](#)

The first eScience User Forum took place on Monday the 21st of June with participants from across the faculties at SDU. We received valuable feedback on our services during the 4 discussion sessions as well as good [Read more ...](#)
